NOTES:

We drove 6 ft. long galvanized steel fence posts alongside each pin set.

The section and section subdivisional lines shown are protracted for general information only.

The areas are calculated to within 30 feet of the centerline of the existing road.

NARRATIVE: This survey was performed at the request of Jim Walker, Assistant County Road Supervisor, acting in behalf of the County Road Department. The purpose of this survey was to delineate an area for a rock quarry and rock storage lease site.

A search was made of the available records pertaining to this survey. Field measurements were made to locate the North 1/4 corner of Section 31, which I remonumented, from original evidence. New monuments were set at locations approved by Mr. Walker, as shown hereon. I found no unusual conditions during this survey.
